Company Name: Adain technologies Limited
Adain Technologies Limited https://www.adaintech.com

---

Overview:
I was serving as a Full Stack Developer Intern at Adain Technologies Limited, actively involved in both front-end and back-end development. Working on-site at ASO Abuja FCT, I contribute to the development of web applications, ensuring a seamless user experience. My role encompasses collaboration with clients, design and development of responsive websites, and customization of existing sites for enhanced functionality.

---

Frontend and Backend Development
**Languages and Frameworks:** HTML, CSS, JavaScript, React, Nodejs, Next Js and TailwindCss

Job Roles and Responsibilities
- Develop front-end and back-end web applications, as well as mobile applications, emphasizing optimal user experience.
- Collaborate closely with clients to understand their business needs and project requirements, ensuring alignment with their goals.
- Design and develop responsive websites from scratch, utilizing frameworks such as React JS, Next JS, and Tailwind CSS for front-end development.
- Utilize technologies like Node JS for back-end services, ensuring robust and efficient functionality.
- Customize and maintain existing websites to enhance functionality and improve the overall user experience.
- Implement secure authentication and user authorization systems to safeguard user data and privacy.
- Integrate payment gateways and e-commerce functionality for online stores, enhancing the business capabilities of the websites.
- Optimize websites for speed, performance, and improved search engine ranking, contributing to a positive user experience.
- Identify and troubleshoot issues promptly to ensure seamless website functionality.

**Chief Technology Officer(CTO)**                                    **02/2024-Till Date**
Onsite job
Location: ASO Abuja FCT
Company Name: Adain Technology Limited

Overview:

I was responsible for overseeing the technological aspects of the company. These include

**Setting the Technology Strategy:**
- Developing and communicating the company's overall technology vision and strategy.
- Aligning the technology strategy with the organization's business goals and objectives.
- Identifying emerging technologies and trends that could impact the company's future.

**Technical Leadership:**
- Providing technical leadership and guidance to the engineering and development teams.
- Setting technical standards and best practices for software development, infrastructure, security, and data management.
- Evaluating and recommending new technologies, tools, and platforms to enhance the company's technical capabilities.

**Innovation and Research:**

- Driving innovation and fostering a culture of creativity and experimentation within the organization. Leading research and development efforts to explore new technologies and solutions that could give the company a competitive advantage. Collaborating with research institutions, startups, and industry partners to stay abreast of the latest technological advancements.

**Product Development and Management:**

- Overseeing the development and launch of new products and features, ensuring they meet quality, performance, and usability standards.
- Working closely with product managers, designers, and engineers to define product roadmaps and prioritize features based on customer needs and market trends.

**Infrastructure and Operations:**
- Managing the company's IT infrastructure, including networks, servers, databases, and cloud services. Ensuring the reliability, scalability, and security of the company's systems and infrastructure. Implementing disaster recovery and business continuity plans to minimize downtime and mitigate risks.

**Team Management and Development:**

- Building and leading high-performing engineering teams, including hiring, mentoring, and coaching talented individuals. Fostering a collaborative and inclusive team culture that encourages learning, growth, and innovation. Providing ongoing feedback and performance evaluations to help team members reach their full potential.

**Communication and Collaboration:**
- Collaborating with other executives, such as the CEO and COO to ensure alignment between technology initiatives and overall business strategy. Communicating technical concepts and decisions to non-technical stakeholders, including board members, investors, and customers.

## SOFT SKILLS

**Analytical Thinking**
Possess an exceptional analytical mind, capable of dissecting complex issues and deriving strategic solutions
